| Netscape Communicator 4.05 and 4.06 will both be temporarily available in /tools/bin for the evaluation. Once the evaluation is     |   |   |                             |                     |                          |                              |             |                   |  |
| complete the ECS COTS baseline will be upgraded and all other versions of Netscape will be removed from /tools/bin.                 |   |   |                             |                     |                          |                              |             |                   |  |
|   |   |   |                             |                     |                          |                              |             |                   |  |
|   |   |   |                             |                     |                          |                              |             |                   |  |
|   |   |   |                             |                     |                          |                              |             |                   |  |
| 29. Proposed Solution: (use additional sheets if necessary)   |   |   |                             |                     |                          |                              |             |                   |  |
| The browser needs to be installed in /tools/bin and made available from a variety of hosts.   |   |   |                             |                     |                          |                              |             |                   |  |
|   |   |   |                             |                     |                          |                              |             |                   |  |
|   |   |   |                             |                     |                          |                              |             |                   |  |
|   |   |   |                             |                     |                          |                              |             |                   |  |
| 1   |   |   |                             |                     |                          |                              |             |                   |  |
| 30. Alternate Solution: (use additional sheets if necessary)  |   |   |                             |                     |                          |                              |             |                   |  |
| There is no alternate solution since, the evaluation needs to take place with accessibility from a variety of hosts. The upgrade is |   |   |                             |                     |                          |                              |             |                   |  |
| necessary, since CLS does not run under our current baseline.   |   |   |                             |                     |                          |                              |             |                   |  |
|   |   |   |                             |                     |                          |                              |             |                   |  |
|   |   |   |                             | •                   |                          |                              |             |                   |  |
